

Rapides Parish Library 3D Printer Policy

The Rapides Parish Library offers 3D Printing to the public. The policy will be reviewed bi-annually (every other year).

- This service is only available to Rapides Parish Library patrons in good standing.
- Only one request can be submitted at a time, and will be added to a queue.
- Jobs that require the printing of many components may drop in the queue position.
- Prints are handed over AS IS. If prints require rafts and support structures, patrons will be responsible for removing these.
- The cost is \$1 per file. The cost of specialty filaments vary to the customer as the cost varies to the Rapides Parish Library.
- The colors available may change without notice, and we cannot guarantee that the selected color will be available. In the event that a chosen color is out of stock, the most similar color available will be used.
- Staff review and prepare all project files.
- Only appropriate files should be submitted. No guns, gun parts, weapons of any kind, or salacious objects will be accepted, nor fictional, replica or toy weapons.
- The Library reserves the right to refuse requests.
- The Library does its best to complete the model within 10-14 days, but if demand for the printer is high, wait times may be longer.
